

Soybean Program | 2026 & 2027

Built to support farm legacies and consumer demand

Understand your program choices and deadlines. Availability may be limited, first come first served.

Soybean Premiums

Each soybean field in the operation receives a score

Production may qualify for multiple premiums based on field-level practices that impact score

Soybean deliveries from all accounts in the operation are combined together, then allocated to eligible production at each premium category (highest rate filled first)

One entity/account (that you designate) will be paid

Score Range <i>g CO2e/bu</i>	Premium <i>\$/bu</i>	Cover Crops <i>Before Soybeans</i>	Tillage	Nitrogen Use
1999 or Lower	\$0.20	High % Acres	Low Soil Disturbance T-DISC Score*	High Yield per lb N applied
2000 or Higher	\$0.05 <i>guaranteed premium</i>	Low % Acres	High Soil Disturbance T-DISC Score*	Low Yield per lb N applied

*Tillage practices will be evaluated using the T-DISC methodology, with soil disturbance thresholds determining eligibility for sustainability scoring. Fields with a T-DISC score ≤ 0.075 will qualify as No-Till, while fields with a score of ≤ 0.252 will qualify as Reduced Till. To receive the full Sustainability Scoring benefit for No-Till acres, fields must be managed under No-Till practices for at least four of the next five years.

Delivery Requirements

ADM Delivery Locations are Subject to Change | Non-GMO Soybeans or other specialty soybeans do not qualify

Soybeans must be:

1

Sold directly to ADM

2

Delivered to an ADM location listed below

3

Delivered during the program delivery window

Illinois

Altamont	Gulfport	Hume	Morris	Ottawa	Shobonier
Creve Coeur	Havana	Lacon	Mound City*	Patoka	Spring Valley
Farina	Hennepin	Mendota	Oakland	Sauget	Tuscola

Indiana

Evansville	Mt. Vernon
Frankfort	Newburgh
	Rockport

Iowa

Burlington
Clinton
Des Moines

Kentucky

Henderson	Paducah*
Ledbetter*	Silver Grove
(Livingston Point)	

Louisiana

Vidalia*

Minnesota

Minneapolis
(Elevator D)
Winona

Missouri

Charleston*	New Madrid*
Deerfield	St. Louis
Mexico	

Tennessee

Heloise*
Memphis*

Arkansas

Helena*

*Indicates locations with a delivery window between August 1 - July 31 of the respective program year

2026 Program Delivery Window

September 1, 2026 - August 31, 2027

2027 Program Delivery Window

September 1, 2027 - August 31, 2028

How It Works

1. Field Scoring

You work with Gradable to upload field/program information so they can score each field.

2. Eligible Production Summary

Using the information you provide, Gradable determines how much production qualifies within each score range.

3. Delivery Tracking

You work with ADM to identify the accounts that deliver grain from your fields.

4. Bushel Allocation & Payment

ADM tracks eligible grain deliveries and allocates bushels to qualifying premium categories based on field scores.

When production qualifies for multiple premiums, bushels are applied to the highest-paying premium first to maximize your payment.

Payment is made to one designated entity for all eligible production.

- A small subset of farmers will be selected for an on-site interview and compensated \$1,000.
- Acres enrolled in another program receiving private funding are not eligible for incentives.

Data Collection Partner

Field boundaries must be submitted to Gradable for all soybean acres. If any acres are participating in another privately and/or publicly funded carbon or sustainability program, those acres must be clearly identified to determine incentive eligibility under the ADM re:generations program.
